Clean Water State Revolving Fund Green Project Reserve Quick Reference Guide Examples Summary

Eligible Green Projects		Non aligible/Non Green	Reference Source
Categorical – No "Business Case" Required	Requires "Business Case" Justification	Non-eligible/Non-Green Types of Projects	for Further Information
 Implementation of green streets & other practices designed to mimic natural hydrology and reduce effective imperviousness. Includes capital equipment necessary to maintain projects. (see 1.2-1, page 5) Green wet weather management systems for parking areas. Includes capital equipment necessary to maintain projects. (see 1.2-2, page 5) Implementation of comprehensive street tree or urban forestry programs (including larger tree boxes). (see 1.2-3, page 5) Stormwater harvesting and reuse projects such as cisterns. (see 1.2-4, page 5) Downspout disconnection projects that manage runoff onsite. (see 1.2-5, page 5) Comprehensive wet weather retrofit programs using green 	Green Infrastructure: Fencing to keep livestock out of streams and stream buffers. (see 1.5-1, page 7) Design criteria for Green Infrastructure business cases can be found in Section 1.4, pages 6 & 7. Example business cases are available at http://www.srfbusinesscases.net/	 Stormwater controls that have impervious or semipervious liners and provide no evapotranspirative or harvesting function. (see 1.3-1, page 6) Stormwater ponds that only provide extended detention including dirt lined detention basins. (see 1.3-2, page 6) In-line and end-of-pipe stormwater filtration and detention systems. (see 1.3-3, page 6) Underground stormwater control and treatment devices. (see 1.3-4, page 6) Stormwater conveyance systems that are not soil/vegetation based such as pipes and concrete channels. Certain exceptions can possibly be justified as "Environmentally Innovative." (see 1.3-5, 	Attachment 2 to FY 2010 SRF Guidance – 2010 Clean Water and Drinking Water State Revolving Fund 20% Green Project Reserve: Guidance for Determining Project Eligibility dated April 21, 2010, Part A

technology approaches. (see 1.2-6, page 5) Establishment or restoration of natural riparian features. (see 1.2-7, page 5-6) Wetland management projects that improve water quality. (see 1.2-8, page 6) Water quality portion of sustainable landscaping and site design projects. (see 1.2-9, page 6) Fee simple purchase of land or easements that have direct benefit to water quality. (see 1.2-10, page 6)		 page 6) Hardening, channelizing, or straightening streams and/or stream banks. (see 1.3-6, page 6) Capital expenditures for maintenance equipment that does not support green infrastructure projects. (see 1.3-7, page 6) 	
Water Efficiency: Installing or retrofitting water efficient devices such as plumbing fixtures and appliances. Includes rebate incentive programs. (see 2.2-1, page 7) Installation of water meters (any type) in a previously unmetered area. (see 2.2-2, page 7) Replacement of existing broken/malfunctioning water meters, or upgrading existing meters. (see 2.2-3, page 7) Retrofitting/adding automatic meter reading capabilities or	 Water Efficiency: Water meter replacement with traditional water meters. (see 2.5-1, page 8) Projects resulting from a water audit or water conservation plan. (see 2.5-2, page 8) Storage tank replacement/rehabilitation to reduce loss of reclaimed water. (see 2.5-3, page 8) New water efficient landscape irrigation systems. (see 2.5-4, page 8) New water efficient 	 Water Efficiency: Agricultural flood irrigation. (see 2.3-1, page 8) Lining of canals to reduce water loss. (see 2.3-2, page 8) Drinking water distribution line pipe replacement. Could potentially be GPR eligible under the DWSRF program. (see 2.3-3, page 8) Leak detection equipment for drinking water distribution system unless used for reuse distribution 	Attachment 2 to FY 2010 SRF Guidance – 2010 Clean Water and Drinking Water State Revolving Fund 20% Green Project Reserve: Guidance for Determining Project Eligibility dated April 21, 2010, Part A

Required	Justification	Types of Projects	Information
leak detection to existing meters (not replacing meters). (see 2.2-4, page 7) • Water audit and water conservation plans that are reasonably expected to result in a water capital project. (see 2.2-5, page 7) • Recycling and water reuse projects that replace potable sources. (see 2.2-6, page 7) • More efficient landscape irrigation systems, either through retrofit or replacement. (see 2.2-7, page 7) • More efficient agricultural irrigation systems, either through retrofit or replacement. (see 2.2-8, page 8)	agricultural irrigation systems. (see 2.5-4, page 8) Design criteria for Water Efficiency business cases can be found in Section 2.4, page 8. Example business cases are available at http://www.srfbusinesscases.net/	piping. (see 2.3-4, page 8)	
 Energy Efficiency: Renewable energy projects (wind, solar, geothermal, microhydroelectric, and biogas) that provide power to a POTW. (see 3.2-1, page 8) Projects that achieve a 20% or more reduction in energy consumption. (see 3.2-2, page 9) Collection system Infiltration/Inflow (I/I) detection equipment. (see 3.2-3, page 9) 	 Energy Efficiency: POTW projects or unit process projects that achieve less than 20% in energy savings. (see 3.5-1, page 10) Projects implementing energy audit recommendations that are not otherwise designated as categorical. (see 3.5-2, page 10) Projects that cost effectively eliminate pumps or pumping stations. (see 3.5-3, page 10) 	 Energy Efficiency: Renewable energy generation that isn't used by a POTW or is privately owned. (see 3.3-1, page 9) General pump or other equipment replacement (due to O&M or end of useful life) that is of average efficiency. (see 3.3-2, page 9) Facultative lagoons, even if integral to an innovative 	Attachment 2 to FY 2010 SRF Guidance – 2010 Clean Water and Drinking Water State Revolving Fund 20% Green Project Reserve: Guidance for Determining Project Eligibility dated April 21, 2010, Part A

POTW energy management planning projects such as energy assessments, energy audits, etc. (see 3.2-4, page 9)	 Infiltration/Inflow (I/I) correction projects that save energy from pumping and reduced treatment costs. (see 3.5-4, page 10) I/I correction projects where excessive groundwater infiltration is requiring otherwise unnecessary treatment processes. (see 3.5-5, page 10) Replacement of pre-Energy Policy Act of 1992 motors with NEMA premium efficiency motors. (see 3.5-6, page 10) Upgrade of POTW lighting to energy efficient sources. (see 3.5-7, page 10) Installation of SCADA systems for energy efficiency. (see 3.5-8, page 10) Variable Frequency Drives (VFDs) based upon an energy savings. (see 3.5-9, page 10) Design criteria for Energy Efficiency business cases can be found in Section 3.4, pages 9 & 10. Example business cases are available at http://www.srfbusinesscases.net/ 	treatment process. (see 3.3-3, page 9) • Hydroelectric facilities except for microhydroelectric projects capturing energy from pipe flow. (see 3.3-4, page 9)

Categorical – No "Business Case"	Requires "Business Case"	Non-eligible/Non-Green Types of Projects	for Further
Required	Justification	Types of Projects	Information
Environmentally Innovative: Total/integrated water resources management planning likely to result in a capital project. (see 4.2-1, page 10) Utility Sustainability Plan consistent with EPA's SRF sustainability policy. (see 4.2-2, page 10) Greenhouse gas (GHG) inventory or mitigation plan and submission of a GHG inventory. (see 4.2-3, page 10) POTW planning activities to prepare for long-term effects of climate change and/or extreme weather. (see 4.2-4, page 10) Construction of LEED certified buildings or renovation of an existing building on POTW facilities. (see 4.2-5, page 10) Decentralized wastewater treatment solutions to existing deficient or failing onsite wastewater systems. (see 4.2-6, page 11)	Environmentally Innovative: Constructed wetlands used for wastewater treatment, polishing, and/or effluent disposal. (see 4.5-1, page 12) CWSRF eligible projects resulting from total/integrated water resource management planning. (see 4.5-2, page 12) Projects that facilitate adaptation of POTWs to climate change. (see 4.5-3, page 12) POTW upgrades or retrofits that remove phosphorus for beneficial use. (see 4.5-4, page 12) Application of innovative treatment technologies or systems that improve environmental conditions. (see 4.5-5, page 12) Educational activities and demonstration projects for water or energy efficiency. (see 4.5-6, page 12) Projects that achieve the goals/objectives of utility asset management plans.	 Environmentally Innovative: Air scrubbers to prevent non-point source deposition. (see 4.3-1, page 12) Facultative lagoons, even if integral to an innovative treatment process. (see 4.3-2, page 12) Surface discharging decentralized wastewater systems where there are cost effective soil-based alternatives. (see 4.3-3, page 12) Higher sea walls to protect POTW from sea level rise. (see 4.3-4, page 12) Reflective roofs at POTW to combat heat island effect. (see 4.3-5, page 12) 	Attachment 2 to FY 2010 SRF Guidance – 2010 Clean Water and Drinking Water State Revolving Fund 20% Green Project Reserve: Guidance for Determining Project Eligibility dated April 21, 2010, Part A
